1.0 General Information

The General Information section explains in general terms the PAWSCUE PH website overview and the sections of the user manual.

1.1 Application Overview

PawscuePH is a dedicated online platform designed to facilitate the adoption of deserving narcotics detection dogs (NDDs) into loving homes. The website simplifies the adoption process through an intuitive application system, catering to individuals and families looking to provide a retirement home for these animals.

The site offers a comprehensive and user-friendly experience, incorporating key functionalities and features such as

- **Structured Adoption Application:** A multi-section application form for collecting detailed applicant information, including personal details, household composition (spouse, other adults, children), living arrangements, and existing pet information.
- **User Authentication:** The platform supports user registration, login, and logout functionalities to manage applicant accounts securely.
- **Application Management:** Users can view previously submitted applications, with options to edit, update, and delete their application information.
- **Clear Application Process:** A "How to Apply" section guides users through the simple three-step process: clicking "Apply Now," accurately filling out the form, and submitting it to await further steps like interviews and adoption finalization.
- **Navigational Ease:** The website includes a clear navigation menu providing easy access to different sections such as "Home," "Our Dogs," "Adopt Now," and "About Us."

PawscuePH is committed to ensuring a smooth and transparent adoption journey for both the applicants and the narcotics detection dogs.

1.2 Organization of the Manual

The user manual consists of the following five sections:

1. General information
2. System Summary
3. Website Navigation
4. Application Form Functionalities
5. Admin Dashboard View

The General Information section provides an overview of PAWSCUE PH and introduces the contents of this user manual.

The System Summary section outlines the hardware and software requirements for accessing the PAWSCUE PH website, along with the various user access levels.

The Website Navigation section details the website's usage and content at a guest level of access.

The Application Form Functionalities section outlines the various features and capabilities available within the adoption application form.

The Admin Dashboard View section explains the features of the admin side of the application, which concerns the summarization of data inputs from the application form.

2.0 System Summary

The System Summary section explains the hardware and system requirements for accessing the PAWSCUE-PH website and user access levels.

2.1 System Requirements

With regard to the development environment of the creators of the project. The recommended system and hardware details are as follows.

The project is a locally hosted full-stack application that runs both the front-end and back-end servers. Recommended hardware requirements

Component	Specification
Processor	Intel Core i3 (8th Gen or newer) / AMD Ryzen 3 equivalent
RAM	8 GB or more
Storage	SSD with at least 1 GB of available space

The project was primarily developed within a Windows 10 environment across all developers. However, the project should be compatible with equivalent updated versions of macOS. Software compatibility.

Operating System	Expected Compatibility
Windows 10	Compatible (tested)
macOS 11+	Compatible
Windows 7/8/8.1	Not Compatible
Ubuntu 20.04 LTS or newer	Compatible
Debian 11+	Compatible
Fedora 36+	Compatible
Linux Mint 20+	Compatible
Pop!_OS 22.04+	Compatible

2.2 User Access Levels

All types of user access levels in the PawscuePH Application environment.

1. Guest User Access
2. Registered User Access
3. Admin Access

Guest User Access are given the most basic privileges of being able to view the website's Home page, About Us, Our Dogs section, and the Adopt Now details section. They are stripped of permissions regarding filling out the application forms.

Registered User Access are given the same privileges with the addition of being able to: submit an application form, edit the submitted form, and delete the submitted form. A Guest User is promoted to Registered User when they are able to successfully finish the account registration/login process. Submitted application forms persist even after account logouts.

Admin Access doesn't have the normal privileges of viewing the website front. The admins have a separate viewing wherein they are specifically allowed to view the summary of all submitted forms. Admins are able to delete form submissions and search forms based on specified identifications or filters.

3.0 Software Installation and Setup

The Software Installation and Setup section explains all specifications that are required to be taken in order for the application to run. It details the application source, installation of required software and tools, and also configurations to be done to finish the skeleton structure of the application.

3.1 Github Repository

This step of the project setup assumes that the user reading this manual has already **git** installed to be able to clone the project or can manually download the project from Github directly.

The source of the application is a remote GitHub repository. Start with the application setup by first cloning the project from the repository.

Github Repository:

- <https://github.com/Brenedict/Pawscue-Fullstack>

3.2 Software Tools and Libraries Requirements

3.2.1 Integrated Development Environment (IDE)

The recommended IDE for this application is the lightweight IDE **Visual Studio Code**. This will primarily serve as the main environment where the project will run. Visual Studio Code is flexible and heavily supported by a community, which makes it highly updated and up-to-date in technologies.

Once Visual Studio Code (VSC) has been installed, you must install a few required VSC extensions so that the application is able to run properly.

Install **Extension Pack for Java**.

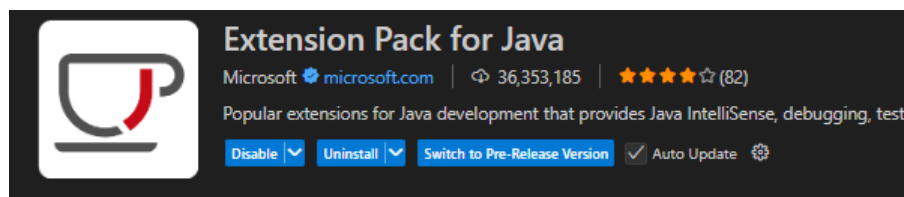

Figure 1. Extension Pack for Java (VSC Extension)

Install **Spring Boot Extension Pack**.

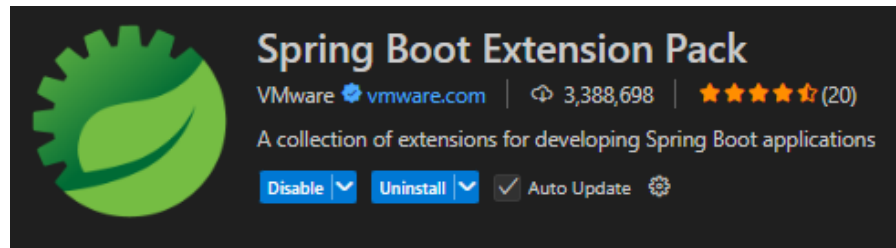

Figure 2. Spring Boot Extension Pack (VSC Extension)

3.2.2 Java Environment

The software's primary Java Development Kit (JDK) version used is **JDK 21**. To avoid any issues, ensure that your installed JDK is 21 or above.

The project also uses maven as a dependency management tool which requires you to install maven. Install **Apache Maven 3.9.10** or higher. For windows specifically install the maven file with the format of "apache-maven-3.9.9-bin.zip". The installation of maven may vary per operating system.

3.2.3 Database Management System (DBMS)

Install **MySQL** as the primary DBMS the project will use.

The developers also highly recommend the installation and use of the **MySQL Workbench 8.0+** to have an easier time managing the database structure of the application.

3.3 Working Application Setup

Before proceeding to this section of the software setup. Ensure that all previous steps starting from chapters 2 to 3.2 have been properly reviewed and followed.

Once "3.2 Software Tools and Libraries Requirements" has been completed, follow the step-by-step procedure in setting up the application.

3.3.1 Database creation

Open mysql, create a new connection. Set Hotsname to “localhost.” Set Port to “3306.”

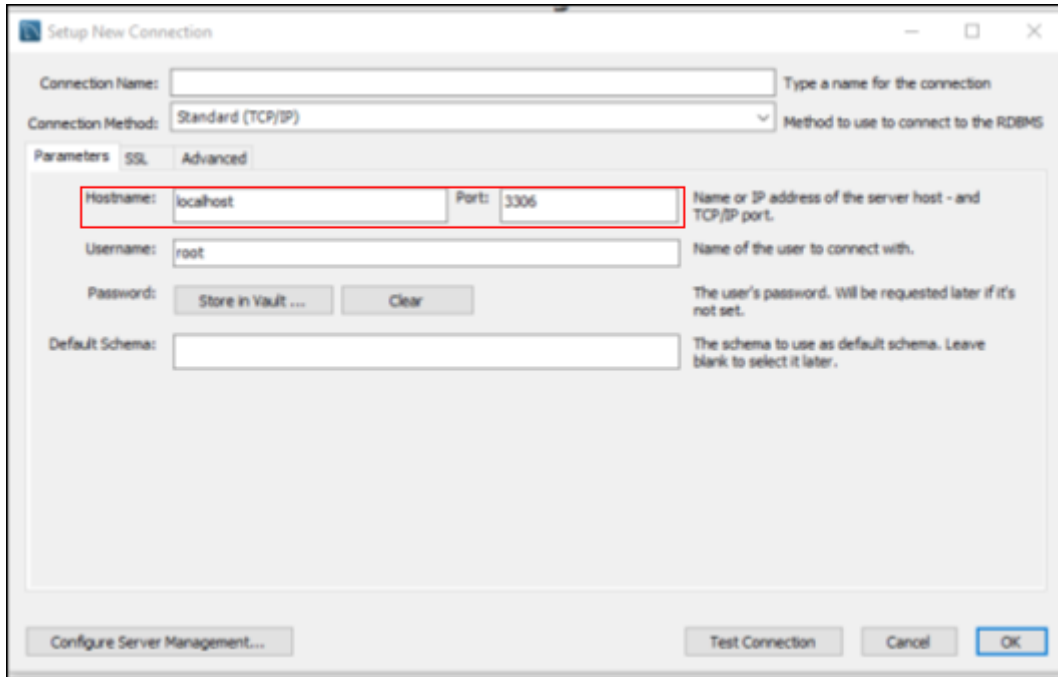

Figure 3. MySQL Connection Configuration

Open the connection to enter the MySQL environment. Build the database structure by first copy-pasting the text from the file provided in the github.

File Directory:

- ***“Pawscue-Backend\sql-scripts\SQLScript-Tables.txt”***

Execute the script provided from the txt file by pressing **“Ctrl + Shift + Enter.”** Congratulations, you now have the database structure of the overall project complete with constraints, primary keys, and foreign keys.

```
7 CREATE DATABASE PawscueAdoptions;
8
9 USE PawscueAdoptions;
10
11 -- >>> Table creation segment
12

Figure 5. Insertion of Sample Data

3.3.2 Database Connection Configuration

To begin configuration of connecting your database built and executed at step 3.3.1, you must open the configuration file.

File Directory:

- **“Pawscue-Backend\Backend\src\main\resources\application.properties”**

You then insert your respective MySQL credentials in the configuration file. Look for these two configuration lines highlighted by the green rectangle.

```
# Application Name
spring.application.name=Backend

# Local SQL JDBC Connection
spring.datasource.url=jdbc:mysql://localhost:3306/PawscueAdoptions
spring.datasource.username=your-mysql-username
spring.datasource.password=your-mysql-password

# Prevent Hibernate from modifying schema
spring.jpa.hibernate.ddl-auto=none
spring.jpa.generate-ddl=false

# Logging/Debugging
spring.jpa.show-sql=true
spring.jpa.properties.hibernate.format_sql=true
logging.level.org.hibernate.SQL=DEBUG
logging.level.org.hibernate.type.descriptor.sql.BasicBinder=TRACE
spring.jpa.hibernate.naming_strategy=org.hibernate.cfg.EJB3NamingStrategy
```

Figure 6. Spring Boot Project Application Properties Configuration

3.3.3 Run the server

Once you have finished all the primary project structure configurations. Open the main java class.

File Directory:

- “Pawscue-Backend\Backend\src\main\java\com\T4BAM\PawscuePh\Backend\BackendApplication.java”

Finally, to allow the main Java class to start working as a server. Press **F5** to run the project or click the run and debug option in Visual Studio Code. Take note: you must run the main class (backend server) first in order for the front-end section of the application to run properly, specifically the: login, registration, and form application sectors.

4.0 Website Navigation (No account login)

The website navigation section contains essential information for users **Browse without an account login**, guiding them through key public pages such as the **Home Page**, **Our Dogs Page**, **Adopt Now Page**, and **About Us Page**, along with their respective contents and functionalities. To access the website, open the “**HomePage.html**” file.

File directory:

- “PawscuePH\HomePage.html”

4.1 Home Page

The user will be greeted with the Home Page, consisting of two prominent call-to-action (CTA) buttons: **Learn More** and **Donate Now**. The navigation bar has six main sections: Home, Our Dogs, Adopt Now, About Us, and most importantly, Sign In and Login.

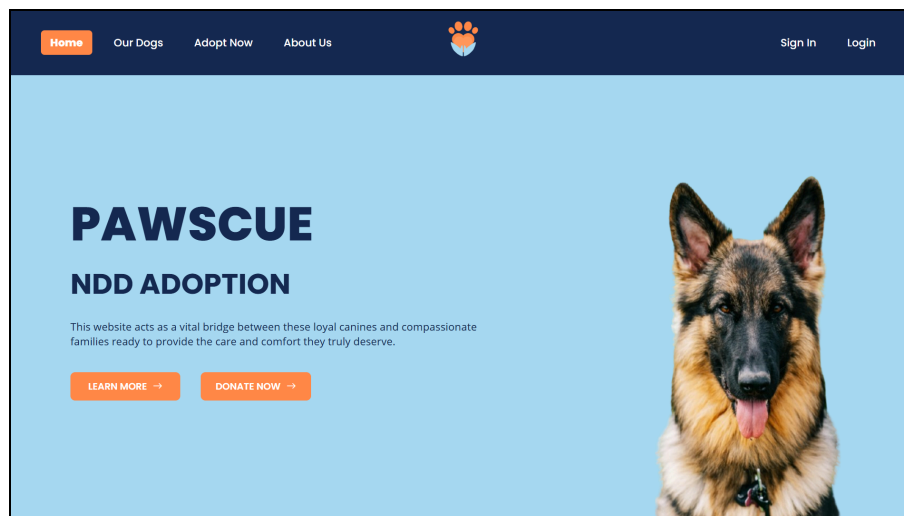

Figure 7. Home Page

As the user scrolls down, the website's mission and goals are presented. For easy browsing, users can navigate through featured content using the arrow buttons on the sides or the carousel slider located below.

GOALS:

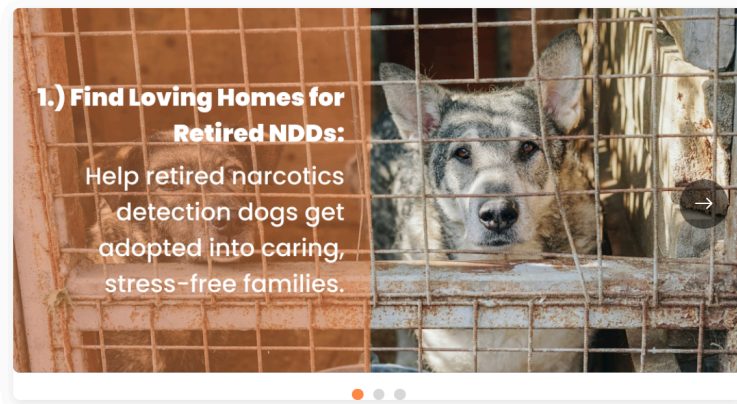

Figure 7.1. Home Page (Goal #1)

BPI: XXXX-XXXX-XX
PAWSCUE PH

PAYPAL: Pawscue PH

Figure 7.4. Home Page (Support A Paw)

4.2 Our Dogs Page

Navigating to the next page, the “**Our Dogs**” section displays all available dogs for adoption. Each dog is presented with key details such as **name**, **gender**, and **breed**.

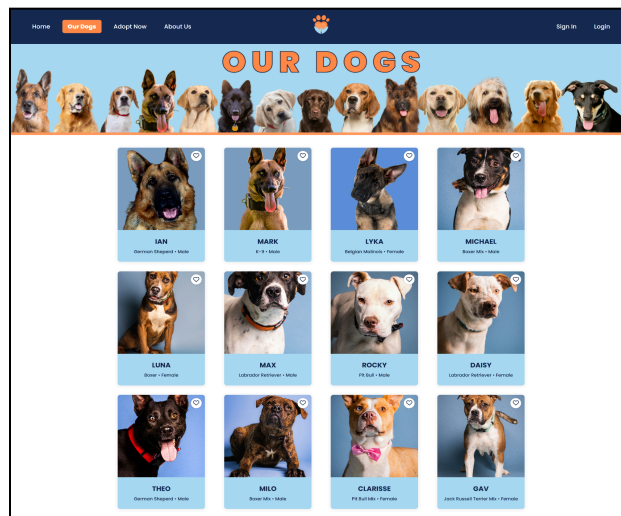

Figure 8. Our Dogs Page

4.3 Adopt Now Page

Once a user has chosen a dog they are interested in, they can click on the dog’s card, which will redirect them to the “**Adopt Now**” Page for more information and to begin the adoption process.

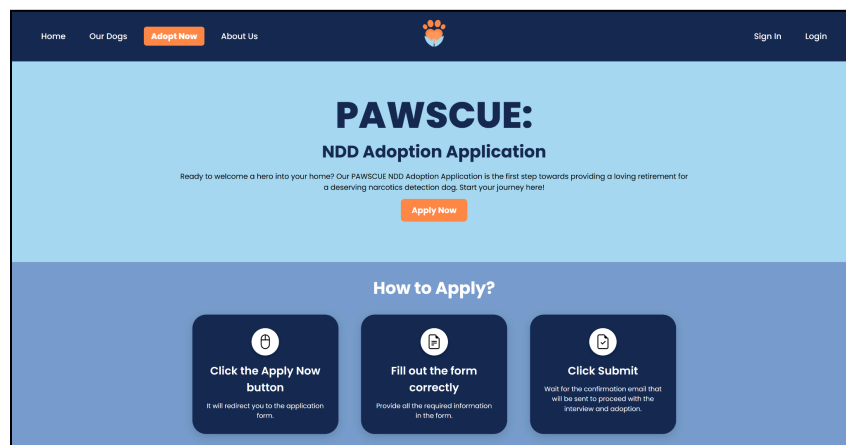

Figure 9. Adopt Now Page

4.4 About Us Page

The “**About Us**” page provides users with an overview of PAWSCUE PH’s mission and goals. It highlights the organization’s dedication to helping Narcotics Detection Dogs (NDDs) find safe and loving homes. The page also introduces the development team behind the platform, allowing users to learn more about the individuals responsible for building and maintaining the system.

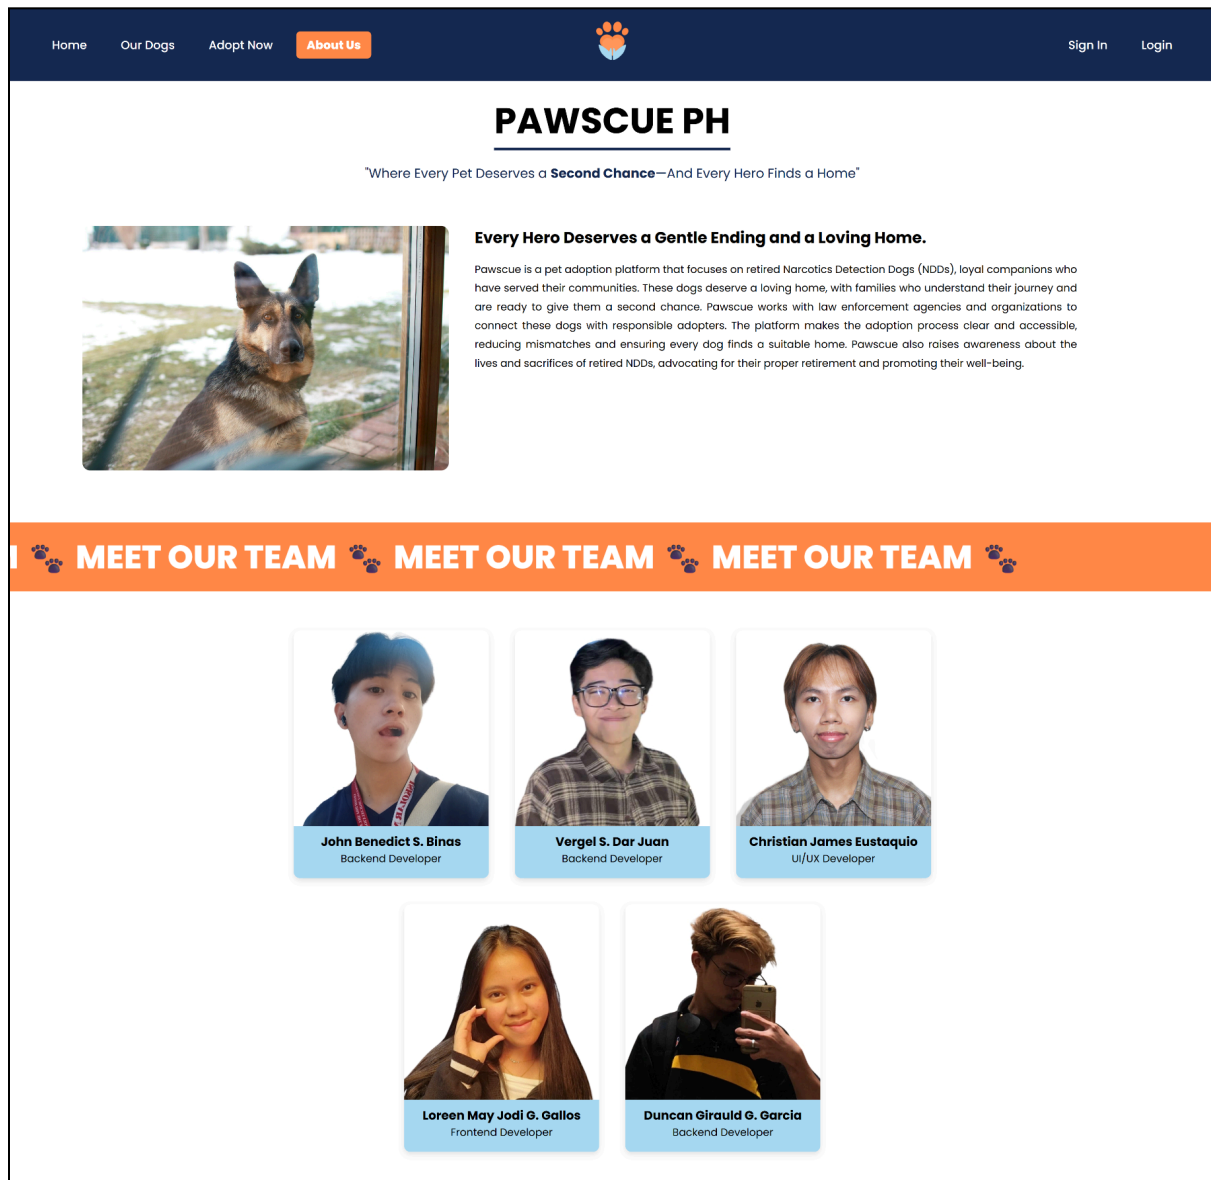

Figure 10. About Us Page

5.0 Application Form Functionalities (with account login)

The Application Form section lets users apply to adopt an NDD. It collects **personal details**, **home information**, and **other information**. Users can access the form, submit required information, track their application, and edit or cancel it if still pending.

5.1 Accessing the Application Form

5.1.1 Sign In/Login Page

To start the adoption process, users must first have an account on PAWSCUE PH. If the user does not have an account yet, they need to register by clicking the “**Sign In**” button and completing the registration form. For users with an existing account, they must **log in** using their registered email and password.

Figure 11. Sign In Page

Figure 12. Login Page

5.1.2 Redirection to the Application Form

Once logged in, users can browse the available dogs listed on the website, where they can find them in the **“Our Dogs”** tab. When they find the dog they want to adopt, they can click the picture of the dog, and this will redirect them to the **“Adopt Now”** page.

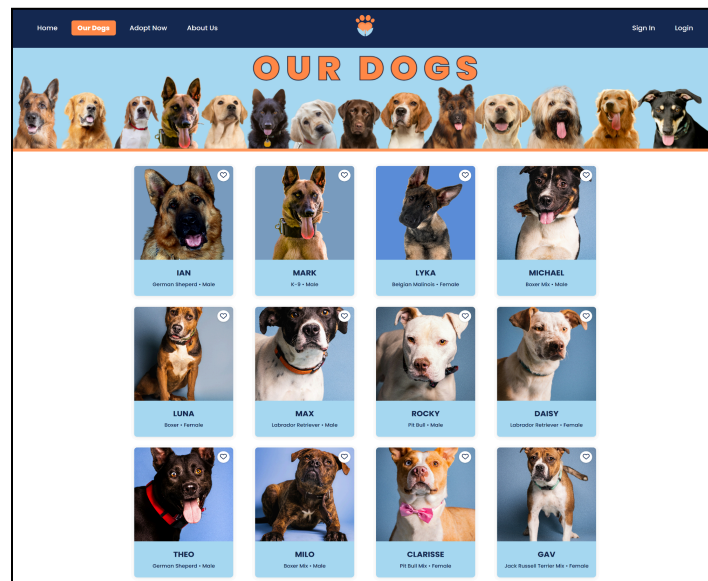

Figure 13 Our Dogs Page

Also, when they find a dog they are interested in, they can click the **“Adopt Now”** tab. This will redirect them to the Application Form, where they can begin providing the necessary information for their adoption request. Users who are not logged in will be redirected to the **“Sign In”** section before accessing the application form.

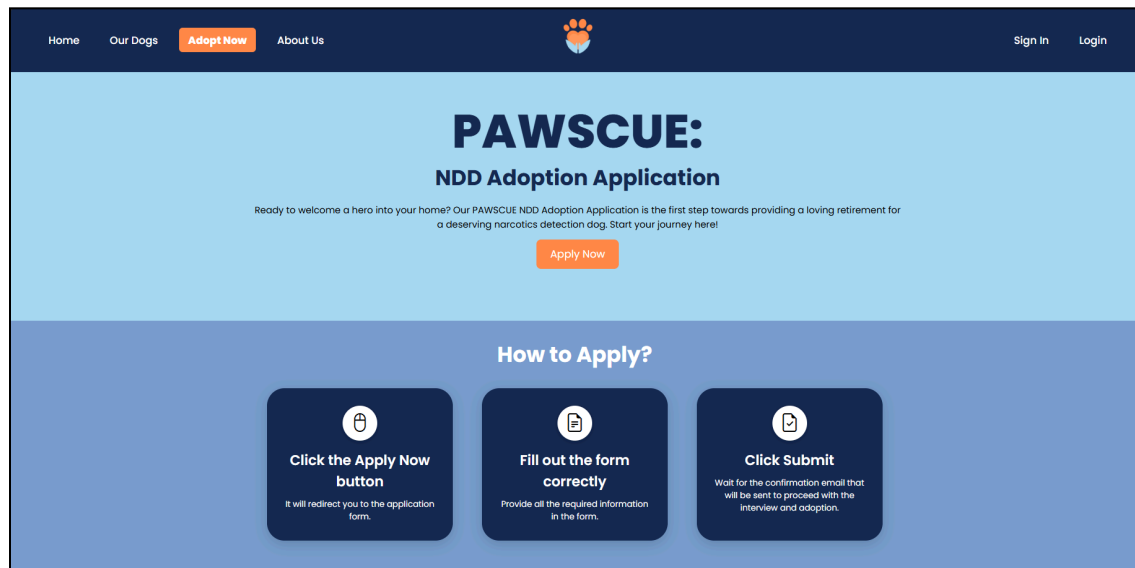

Figure 14. Adopt Now Page

5.2 Filling Out the Application Form

The Application Form requires users to provide complete and accurate information to proceed with their adoption request. By clicking the **“Apply Now”** button in the “Adopt Now” tab.

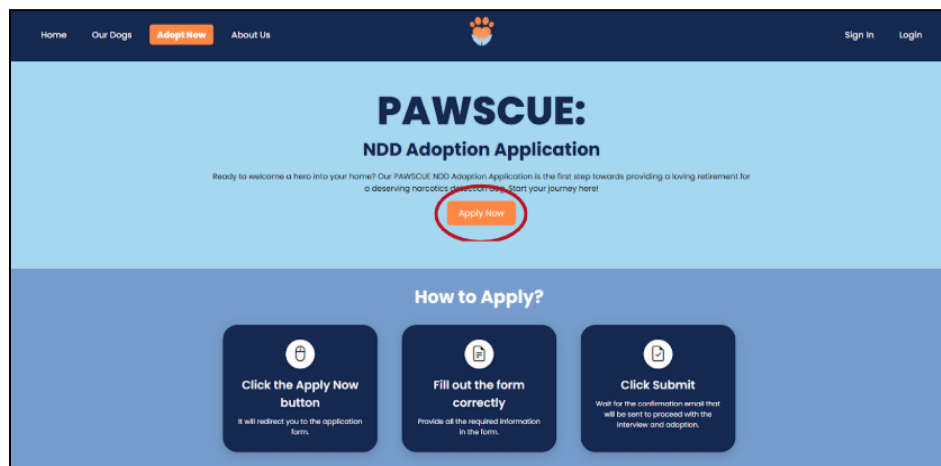

Figure 15. Adopt Now Page

After the **“Apply Now”** button has been pressed, users will need to enter their **full name, contact number, email address**, etc. The form also includes fields for **spouse details** and **adults living in the household**, such as the **number of adults in the household** and **current/previous pet ownership** experience. Mandatory fields are clearly marked with an **asterisk (*)**, and users must ensure all required sections are completed and accurate before submission.

Submit Application

Figure 16. Adoption Application Form

5.3 Submitting the Application

After filling out all required fields, users can review their information to make sure everything is correct. Once ready, they can click the **“Submit Application”** button to send their application.

Figure 17. Adoption Application Page

After pressing the **“Submit Application”** button, it will prompt a confirmation; if they want to submit their application completely, they can click the **“Submit”** button.

Figure 18. Application Submission Confirmation Prompt

5.4 Editing or Cancelling Application Form

If a user needs to make changes to their application or decides to cancel the request, they can do so by visiting the **“Adopt Now”** section and clicking the **“View Form”** button.

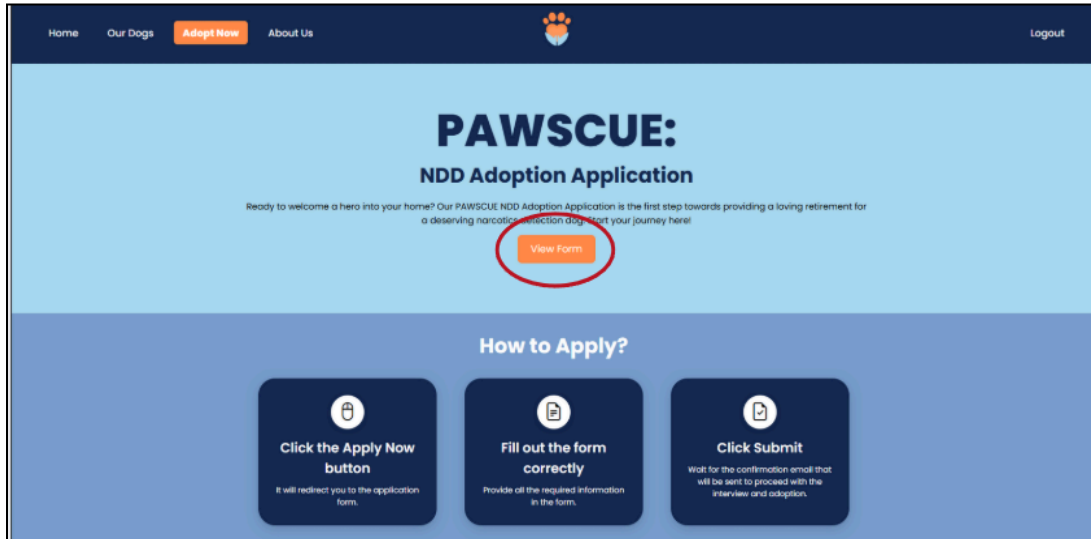

Figure 19. View Form

After clicking the **“View Form”** button, users must scroll down until they find the two buttons, namely, the **“Edit Information”** and **“Delete Information”** buttons. The users can decide what they can do with their application form.

Figure 20. Viewing Adoption Application Form

5.4.1 Editing Application Form

If the users decide to modify their saved information, they must click the **“Edit Information”** button and modify/change the information.

The screenshot shows the Pawscue adoption application form. The form is titled "Adopt Now" and includes a "Logout" link. The form contains several sections with questions and input fields:

- Do you?** (radio buttons: Own, Rent, Yes, No)
- Does your landlord/lease or co-op allow pets?** (radio buttons: Yes, No)
- Do you have screens on your windows?** (radio buttons: Yes, No)
- How many children are at home?** (text input: 2)
- Where will your be your pet kept primarily?** (radio buttons: Indoors, Outdoors)
- Maximum number of hours NDO will be left alone daily?** (text input: 2)
- Who will be the caretaker for the pet?** (radio buttons: Self, Spouse, Roommate)
- Are there any other adults living in the household?** (radio buttons: Yes, No)
- Do you own or have you owned other dog?** (radio buttons: Yes, No)

At the bottom of the form, there are two buttons: "Edit Information" (circled in red) and "Delete Information".

Figure 21. Editing Adoption Application Form

After the users have completely modified their information, they must click the **“Save Changes”** at the bottom of the application.

The screenshot shows the Pawscue adoption application form. The form is titled "Adopt Now" and includes a "Logout" link. The form contains several sections with questions and input fields:

- Do you?** (radio buttons: Own, Rent, Yes, No)
- Does your landlord/lease or co-op allow pets?** (radio buttons: Yes, No)
- Do you have screens on your windows?** (radio buttons: Yes, No)
- How many children are at home?** (text input: 2)
- Where will your be your pet kept primarily?** (radio buttons: Indoors, Outdoors)
- Maximum number of hours NDO will be left alone daily?** (text input: 2)

- Are there any other adults living in the household?** (radio buttons: Yes, No)
- Do you own or have you owned other dog?** (radio buttons: Yes, No)

At the bottom of the form, there is a button: "Save Changes" (circled in red).

Figure 22. Saving Changes Adoption Application Form

After clicking the **“Save Changes”** button, it will prompt an **Update Confirmation** to confirm if they want to save the changes information; click **“Update”** to completely update their application form.

Figure 23. Update Confirmation Prompt

5.4.2 Deleting Application Form

If the users decide to completely delete their application form, they must click the **“Delete Information”** button to delete their application form.

Figure 24. Deleting Adoption Application Form

After clicking the **“Delete Information”** button, it will prompt a **Warning prompt** to confirm if they want to delete all information in the form; click **“Delete”** to completely delete their application form.

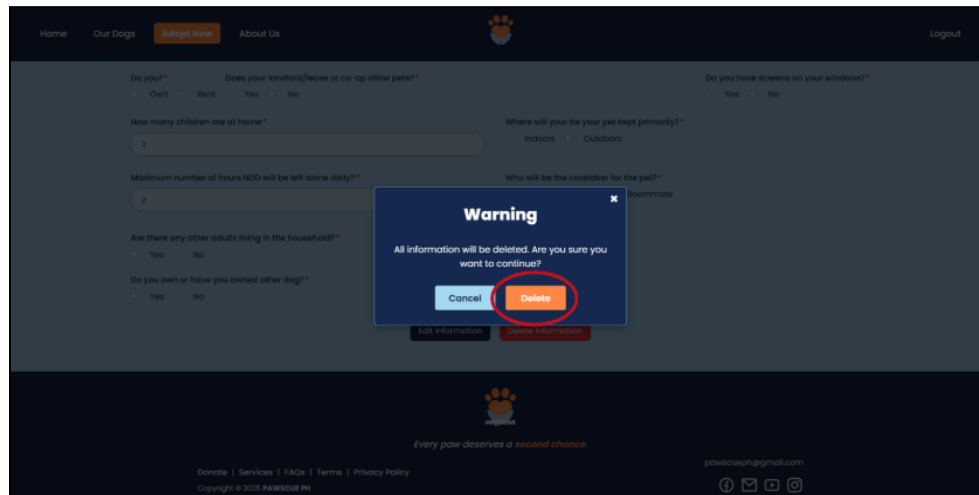

Figure 25. Delete Confirmation Prompt

5.5 Common Errors and Solutions

Users may encounter some common issues while filling out or submitting the application form. If the system displays a **“Missing Required Fields”** error, users should double-check to ensure all mandatory sections marked with an **asterisk (*)** are filled out. If users experience technical issues during submission, **refreshing the page** or **trying again later** is recommended. For persistent problems, contacting the system administrator is advised.

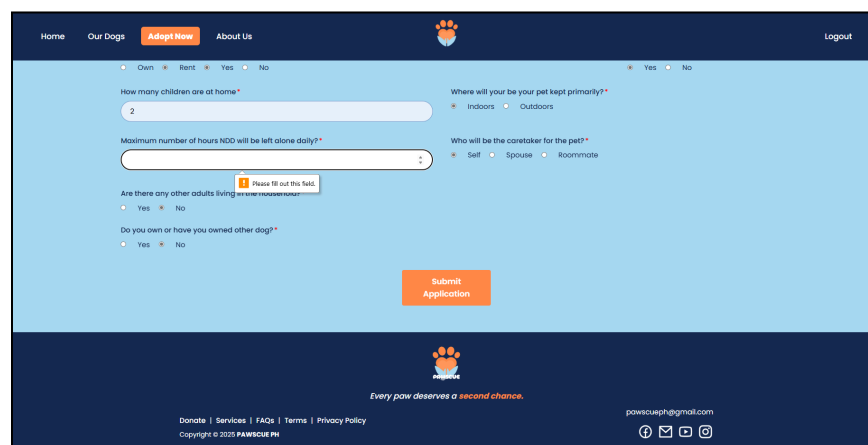

Figure 26. Unfilled Required Information Field

6.0 Admin Dashboard View

The **"Admin Dashboard View"** section provides a comprehensive guide for administrators on accessing and managing the PAWSCUE PH system, detailing the various functionalities and information available from a privileged perspective.

6.1 Accessing Admin View

Before accessing the admin dashboard, users are **required to log in**. Input the admin credentials and click **"Login."** After clicking the "Login" button, the user will be **redirected to the Admin Dashboard**. The credentials can be accessed and modified directly within the **"Admin Login.js"** file.

File Directory:

- **"PawscuePH\Admin Login.js"**

Figure 27. Admin Login Page

6.1.1 Account Forgot Password

When the user clicks the **“Forgot Password?”** a Forgot Password Prompt will appear, and **usernames are required** before the **“Send Reset Link”** button will be clicked. For this project, it is just a **simulation**, as users can change their credentials directly through the **“Admin Login.js”** file.

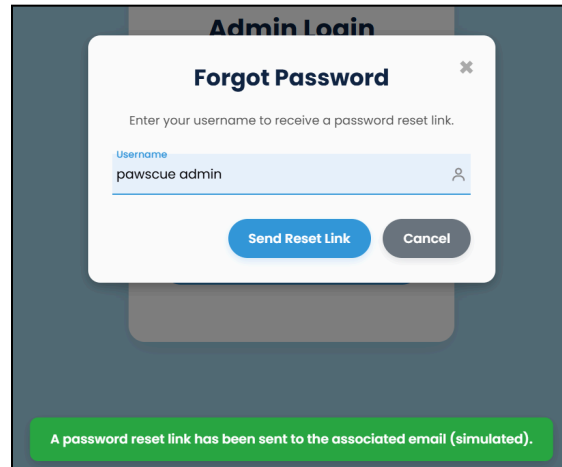

Figure 28. Forgot Password Prompt

6.2 General Functionalities

The General Functionalities section outlines the functionalities present on every page.

6.2.1 Pagination

Users can adjust the number of items displayed per page using the **“Show”** button, with options for **‘10,’ ‘20,’ ‘50,’ or ‘100’** entries.

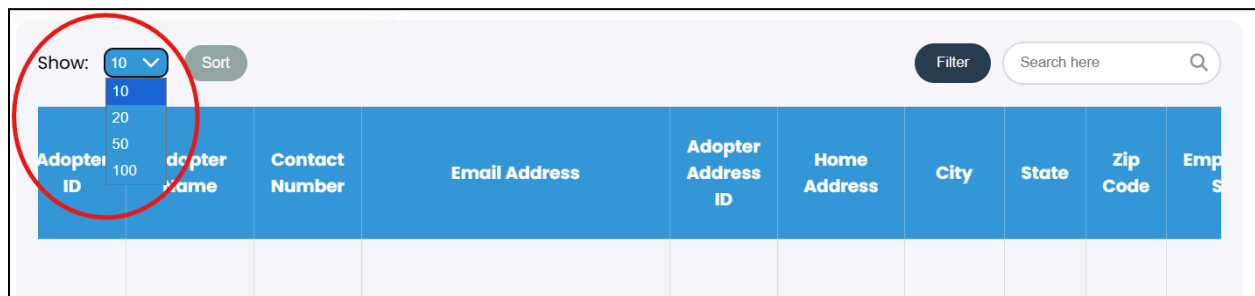

Figure 29. Show Button

Their selection dynamically updates the pagination controls located at the bottom of each page. The **“Previous”** button allows users to navigate to the preceding set of

data, while the **“Next”** button proceeds to the subsequent set. Additionally, users can directly click on the **numbered buttons** to jump to a specific page of data.

Figure 30. Pagination

6.2.2 Filtering

The **“Filter”** button enables users to refine the displayed material based on certain criteria, improving their search experience. Once a user clicks the “Filter” button, a prompt will appear, allowing them to select their desired criteria. The available filter options will vary depending on the exact page being read. When you add filters, the presented data set will dynamically change to show only the items that meet the criteria you selected.

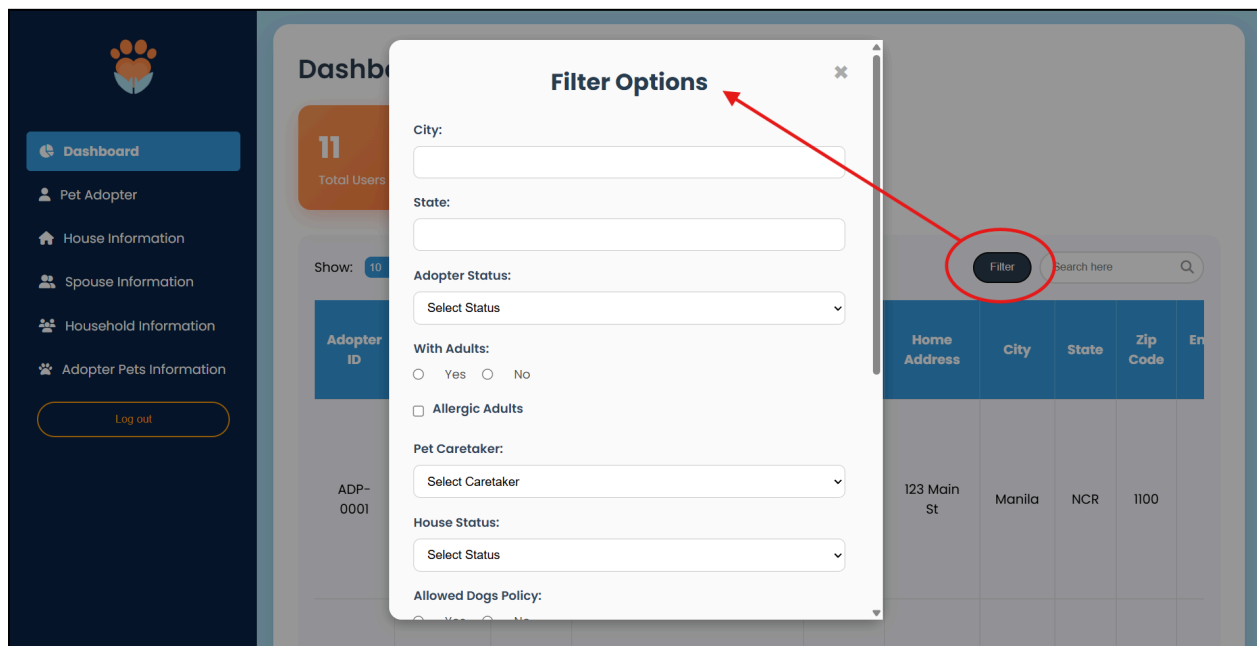

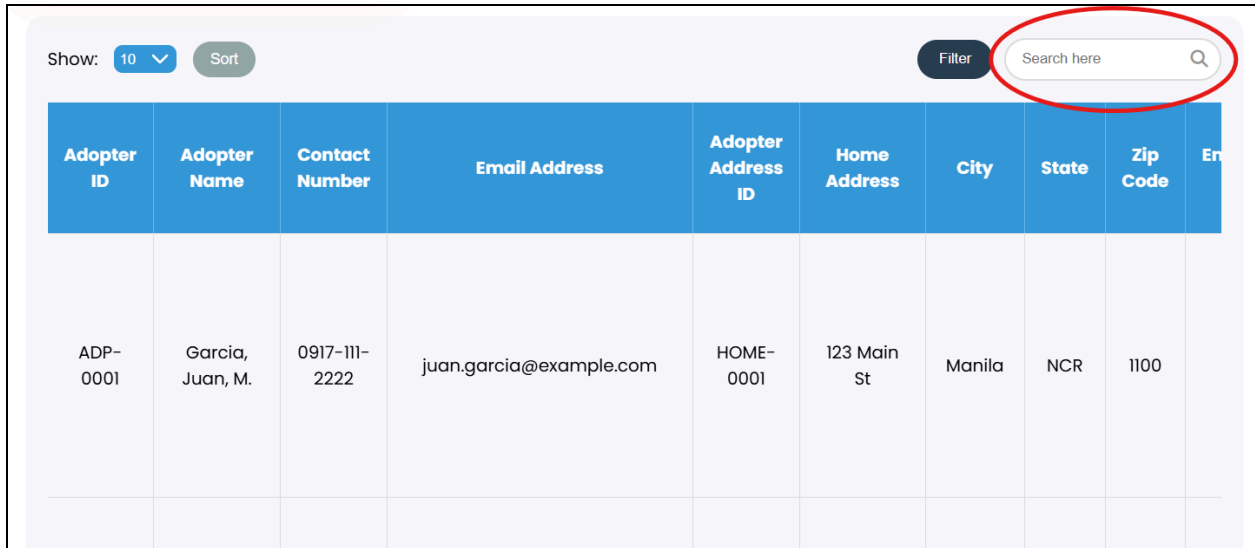

Figure 31. Filter Options

6.2.3 Searching

When a user **inputs text** into the **search bar**, the system will display data containing those words, regardless of capitalization or their location within the data.

The screenshot shows a web application interface. At the top, there is a search bar with the placeholder text "Search here" and a magnifying glass icon. To the left of the search bar are buttons for "Filter" and "Sort". Below the search bar is a table with the following columns: Adopter ID, Adopter Name, Contact Number, Email Address, Adopter Address ID, Home Address, City, State, Zip Code, and En. The table contains one row of data:

Adopter ID	Adopter Name	Contact Number	Email Address	Adopter Address ID	Home Address	City	State	Zip Code	En
ADP-0001	Garcia, Juan, M.	0917-111-2222	juan.garcia@example.com	HOME-0001	123 Main St	Manila	NCR	1100	

Figure 32. Search Bar

6.2.3 Sorting

The **"Sort"** button, when clicked, will display a prompt offering various sorting options that are relevant to the current page. This feature allows users to organize the displayed data based on their chosen criteria, in either ascending or descending order.

Figure 33. Sort Button

6.2.4 Navigation Sidebar

There are six sidebars located on the left side of the page: **Admin Dashboard**, **Pet Adopter**, **House Information**, **Spouse Information**, **Household Information**, and **Adopter Pets Information**. Once the user clicks, it will directly go to the desired page displayed on the right side.

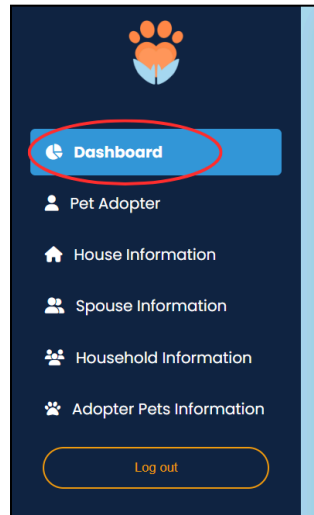

Figure 34. Navigation Sidebar

6.2.5 Log out

Once the user is done navigating throughout the pages, they can rightfully click the log-out button. After logging out, the user is automatically redirected to the admin login page.

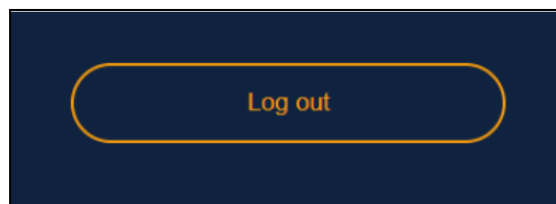

Figure 35. Log Out Button

6.3 Admin Dashboard Page

The admin dashboard contains a centralized view of the adopters and their related information. The **total users'** cards display the total number of registered adopters in the system. If the value shows 'N/A,' it indicates that there are no adopter records present.

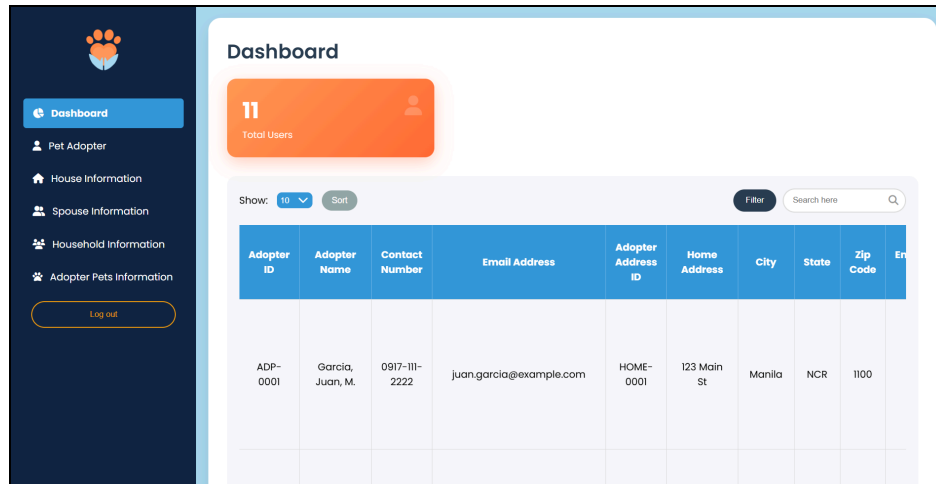

Figure 36. Admin Dashboard Page

6.3.1 Deleting Adopters Information

The **"Delete"** button allows the admin to permanently erase all adopter information across all pages and from the database.

Dashboard										
Show: 10 Sort Filter Search here										
the t cy	Window Screens	Pet Living Area	Pet ID	Pet Breed	Pet Age	Surgical Sterilization	Years Owned	Pet Status	Vaccinated	Actions
VED	Yes	Indoors	PET-0001	Aspin	10	None	10	Alive	No	
			PET-0011	Puspin	2	None	2	Alive	Yes	Delete
			PET-0012	Persian Cat	3	Spayed	2	Alive	Yes	

Figure 37. Delete button

6.4 Pet Adopter Page

The Pet adopter page allows users to view detailed information regarding individuals who have applied to adopt pets. Each record contains **personal**, **contact**, and **employment data** to help verify adopter eligibility.

Adopter ID	Adopter Name	Contact Number	Email Address	Adopter Address ID	Spouse ID	Employment Status	Employer Name	V
ADP-0001	Garcia, Juan, M.	0917-111-2222	juan.garcia@example.com	HOME-0001	AS-0001	Working	Tech Solutions	
ADP-0002	Limlingan, Richard, E.	0956-234-2115	richardtetsuya@hotmail.com	HOME-0002	AS-0002	Working	Edwin Ano	09
ADP-0003	Reyes, Ana, L.	0922-333-4444	ana.reyes@example.com	HOME-0003	AS-0003	Retired

AS-0006	Dela Cruz, Maria, R.	Global Corp	0955-888-9999	789 Business Park, Pasi
AS-0007	Fernandez, Luis, P.	Creative Inc	0966-999-0000	321 Art St, Makati
AS-0008	Torres, Carla, S.	Finance Ltd	0977-000-1111	654 Money Ave, Manil

Figure 40. Spouse Information Page

6.7 Household Information Page

The Household information section contains crucial data regarding other **adult members** living in the adopter's home. This is beneficial in determining whether an environment is safe and appropriate for pet adoption, particularly for pets with allergy concerns or special socializing requirements.

Household Adult ID	Adult Name	Adult Allergy	Work Contact Number	Adult Employer
HA-0001	San Juan, Mario N.	Yes		
HA-0002	Rails, Ruby, E.	No	(02) 8741 1692	Puregold
HA-0003	Dela Cruz, Ana P.	No	0917-123-4567	Tech Solutions
HA-0004	Santos, Luis M.	Yes		
HA-0005	Lopez, Carla T.	No	0933-555-6666	University
HA-0006	Fernandez, Jose R.	No	0944-777-8888	Creative Inc
HA-0007	Torres, Maria S.	Yes		
HA-0008	Reyes, Pedro L.	No	0955-999-0000	Global Corp
HA-0009	Gomez, Carla M.	No	0966-111-2222	Finance Ltd
HA-0010	Perez, Juan M.	No	0921-333-4455	BPO Co.

Figure 41. Household Information Page

6.8 Adopter Pets Information Page

The Adopter pets information section includes details about the **adopter's current or prior pets**. This is critical in determining the adopter's pet care experience, responsibility, and household compatibility for new pets.

Pet ID	Pet Breed	Pet Age	Surgical Sterilization	Years Owned	Pet Status
PET-0001	Aspin	10	None	10	Alive
PET-0002	Belgian Malinois	3	None	2	Rehomed
PET-0003	Golden Retriever	5	Spayed	3	Alive
PET-0004	Siberian Husky	4	Neutered	2	Alive
PET-0005	Bulldog	7	Spayed	5	Alive
PET-0006	Beagle	2	Neutered	1	Alive
PET-0007	Poodle	6	Spayed	4	Alive
PET-0008	Chihuahua	3	None	3	Alive
PET-0009	Labrador	8	Neutered	7	Alive
PET-0010	Shih Tzu	1	Spayed	1	Alive
